

## Autumn Knowledge Organiser- Reception

In **Reception** children will learn the following:

### Seasons- Autumn

By the end of this topic, we want the children to have an embedded knowledge of the following:

- In Autumn we see the autumnal colours red, brown, yellow, orange and green.
- Due to the change in weather, leaves begin to fall off the trees in preparation for Winter.
- Autumn is one of the four seasons that occur over the year.
- Animals begin to find food outside in preparation for Winter (hibernation).

Key vocabulary your child will learn and can define are:

<b>Autumn</b>	A season that comes after Summer, preparing us for Winter.
<b>Hibernation</b>	The period when an animal stays dormant (asleep) during the cold Winter months.
<b>Weather</b>	The change of state in the atmosphere. For example: Rain, cloud, thunder, sunshine etc.
<b>Temperature</b>	Temperature is used to describe how cold or hot something is including the weather or food.
